EDUCATION

University of Maryland College Park

College Park, MD

Bachelor of Science in Computer Science, Minor in Business

Expected to Graduate in May 2026

- **Honors & Awards:** Dean's List (2023–2024, 2024–2025), Bitcamp 2026 Razzle Dazzle Winner

EXPERIENCE

Dentalmon - Automated Dental EOB Processing Platform

May 2025 – Present

Fullstack Developer

College Park, MD

- Built an AI-powered EOB automation platform using **Django** and **Celery**, reducing per-EOB processing time from **90 minutes to 3 minutes (30x faster)** across patient matching, fee calculation, and OpenDental sync
- Engineered a multi-stage OCR pipeline supporting **18+ U.S. dental insurance carriers**, retry logic with temperature annealing, and parallel EDI 835 parsing
- Implemented **HIPAA-compliant PHI handling** with per-user Fernet encryption, HMAC-keyed trigram blind indexes for encrypted-field search, and PHI access audit logging via Django middleware
- Designed a cross-PDF patient deduplication engine using **SHA-256 identity hashing**, with multi-stage fee calculation covering primary, secondary, and write-off flows, and a JSON patch resolver with database normalization

InZone

May 2025 – Aug 2025

Software Engineer Intern

College Park, MD

- Architected an end-to-end AI pipeline orchestrating **ChatGPT**, **Meshy AI**, and **ElevenLabs** APIs to generate personalized **3D avatars** with voice synthesis, increasing average session time by **2x**
- Built a **Ready Player Me** avatar customization flow including anonymous authentication, template selection, real-time asset equipping, and **GLB** rendering, embedded in a **React** WebView
- Implemented a **Firestore**-backed coin economy for voice interactions with balance validation, atomic Firestore deduction, and conversation logging across **iOS** and **Android**, including platform-specific **in-app purchase** tiers

NEMO Research Assistant

Feb 2025 – May 2025

Research Assistant

College Park, MD

- Optimized **parallel algorithms** in **C/C++** stellar dynamics simulations, reducing runtime
- Ported core modules for cross-platform compatibility across **Windows** and **macOS**, removing platform dependencies

Hancom – Cross-Platform Transition

Jun 2024 – Aug 2024

Software Engineer Intern

South Korea

- Migrated **iOS** and **Android** applications to **Flutter**, improving cross-platform maintainability and increasing development efficiency by **30%**
- Collaborated with **6 developers** and **3 designers** to build high-fidelity prototypes and improve feature integration
- Delivered project milestones **15% ahead of schedule** by refining development workflows

GIT – Automobile Diagnostic Solution

Jun 2019 – Aug 2019

Software Engineer Intern

South Korea

- Built **EV diagnostic modules** in **C/C++** for real-time safety monitoring and sensor data analysis
- Reduced diagnostic scan time by **20%** by optimizing vehicle inspection data pipelines

PROJECTS

August - Automate Scheduling System | *Software Engineer, Lead Developer*

Jun 2023 – May 2025

- Co-founded and led development of a college scheduler app for **Android** and **iOS** using **Flutter** with a focus on cross-platform UX
- Designed a scheduling algorithm analyzing available slots, open seats, and preferences to generate optimal timetables
- Integrated **20+ RESTful APIs** and built **web scrapers** for real-time course data from school websites

AI Couple Compatibility Scoring System | *Python, TensorFlow, AWS, Django*

Dec 2024 – Feb 2025

- Built a **TensorFlow** AI model for couple compatibility, trained on **50,000+** labeled images with **95% accuracy**
- Designed **real-time scoring APIs** with Django and AWS, integrating embedding-based similarity measures
- Delivered responsive AI-powered UX for web and mobile using **React**, and **Flutter**

TECHNICAL SKILLS

Languages: Java, Python, Flutter, Dart, JavaScript, HTML/CSS, OCaml, Kotlin, React, TailwindCSS

Developer Tools: VS Code, Visual Studio, Eclipse, Android Studio, Xcode, Matlab, Grace
